

NEW PRODUCT IN STOCK AND READY TO ORDER

INTRODUCING

A innovative, rapid setting, white, gypsum based tile adhesive specially designed for fixing ceramic, porcelain and natural stone tiles to Anhydrite/ Calcium Sulphate floors.

Uses

Gypfix is a high strength adhesive which achieves levels of bond strength on a par with traditional C2 category cement based adhesives. The product performs exceptionally well with undertile heating and other forms of UFH (under floor heating). In the majority of cases priming is not required – there is no risk of Ettringite with this product. Gypfix is easy to mix and apply and is suitable for all formats of tiles.

Features

- *100% compatibility with Anhydrite Screeds*
- *Tested in conjunction with Lafarge Gyvlon*
- *No priming required*
- *Suitable for floors with up to 85% RH (1% by weight)*
- *Rapid bond strength development*
- *Long open time*
- *Thin or thick applications.*
- *Easy to mix and apply*
- *Grout after Approx 4 hour*
